Anticipating the Unexpected

Even with all the precautions we take to keep ourselves and our families safe, accidents sometimes happen. And, in addition to physical challenges, accidents can lead to financial difficulties as well.

EmergencyCare Plus insurance from American General Life is designed to provide benefits for a wide range of accident-related costs — from emergency room visits to physical therapy to family lodging. EmergencyCare Plus helps protect your family against many of the unexpected financial burdens that an accidental injury can bring about, allowing you to better manage the costs and focus on getting your life back to normal.

Did you know...

- About 1 out of every 9 Americans seek medical attention for an injury each year¹
- About 35% of the disabling injuries suffered by Americans in 2007 occurred off the job — and therefore were not covered by workers' compensation¹
- In 2007, the economic impact of unintentional injuries equate to about \$2,300 per person¹

Jack, 16, future basketball star
Fractured wrist, needed non-local treatment

No parents could be prouder than John and Samantha of their son Jack, who was well on his way to becoming a star center. When Jack fractured his wrist in the final game of the season, the family's doctor referred them to a specialist — who was located several hundred miles away.

Thanks to the family's EmergencyCare Plus insurance policy, they were able to apply benefits toward their travel expenses and received additional benefits for the treatment and physical therapy. Jack made a full recovery and was back on the court the following season, good as new.*
