OPTIONAL SERVICES

Services that are more expensive than the form of treatment customarily provided under accepted dental practice standards are called "Optional Services." Optional Services also include the use of specialized techniques instead of standard procedures. For example:

- (a) a crown where a filling would restore the tooth;
- (b) an inlay/onlay instead of an amalgam restoration;
- (c) a composite/resin restoration instead of an amalgam restoration on posterior teeth.

If you receive Optional Services, your Benefits will be based on the lower cost of the customary service or standard practice instead of the higher cost of the Optional Service. You will be responsible for the difference between the higher cost of the Optional Service and the lower cost of the customary service or standard practice.
